

# Sensitivities of the Gains above Mead natural flow due to the updated Lake Mead elevation-volume and elevation-area tables.

*Alan Butler*

*Monday, December 29, 2014*

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
source('getSensitivityFigures.R')
zz <- getSensitivityFigures()
```

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
